

Gaialux asbl programme and activity report

Gaialux asbl is a new project in Luxembourg: Born in March 2022, the essential core of the association is that the ecological transition – which urgently needs to be adopted as a concrete and coherent political agenda in the short/medium-term with no more delay - cannot take place without a deep rethinking of our social and economic model of producing and consuming.

The goal of Gaialux asbl is to develop actions and initiatives of awareness dedicated to the Sustainability Agenda taking into account all the dimensions of the present climate crisis. Despite the clear difficulties in terms of concrete feasibility, the Agenda 2030 has the strength to be a forward-looking and comprehensive programme that keeps together all the key important dimensions of a Sustainable blueprint.

This is why we embarked on the current project “Imaginez la Durabilité” dedicated to the SDGs, as an extremely evocative project in line with our action plan, but also to insist on building a good knowledge of the SDGs as they are still extremely topical today. We also thought that Art can be a powerful way to tackle the climate crisis while, at the same time, stimulating change, critical thinking, vision, and determination to act as citizens in the full meaning this word requires.

Gaialux also intends to promote community initiatives that can contribute to the objectives of the Agenda 2030, as a main goal. For this reason, we invite you to express your proposals, ideas, and possible projects you would like to contribute to either writing to us (gaialux.asbl@gmail.com) or/and leaving a message on the guest book that you find at the entrance.

Artists of the project

The Expo' is kindly supported by Ben Carter / L'Expo' est aimablement soutenu par Ben Carter <https://www.bencarter.lu/>; Pierluigi D'Alessio SDG 13 ; Gianmarco Design: SDG 14; Ane Erezue – SDG 6; Miriam R.
